Q. No. 1 Section-A (Reading Skill)	10
Q. Nos. 2, 3 & 4 Section-B (Advanced Writing Skills)	25
Q. Nos. 5, 6, 7, 8 & 9 Section-C (Grammar)	20
Q. Nos. 10, 11, 12, 13, 14, 15 & 16 Section-D (Text books)	45

Total = 100

Contd.

SECTION-A

(Reading Skill : 10 Marks)

1. Read the following passage carefully :

The next time you take printouts unnecessarily or you throw a paper into the bin, think for a minute as to how many trees have been felled to manufacture something you use so often every day.

Can you take out some time from your everyday routine and devote it to starting a simple recycling programme at your school or your neighbourhood ? Not only would you save our planet from the torture of felling greenery, but you would also reduce generation and dumping of waste into the environment.

Using recycled papers conserves natural resources. As our worldwide population grows, the strain on these resources becomes even greater. You can drastically reduce the number of trees cut down for manufacturing paper. In addition to saving landfill space, you cut down on your expenses of trash-disposal. There is a reduction in air pollution caused due to incineration. Making papers from discards instead of trees not only saves forests, but it also reduces energy use by up to three quarters and requires less than half as much water. Items that are made of paper and may be recycled are called the loose paper, a few examples are paper bags, magazines, newspapers and cardboard egg-trays.

A paper-recycling programme gives a positive image to large corporations or business organizations. Parents can teach their children the importance of recycled paper by bringing about simple changes in their lifestyle. Schools can also train students to make paper products like folders, penholders, material for the display board, lampshades, teaching/learning aids, etc. Students can creatively make their own cards, files, folders, invitation cards and certificates for the school. Working on a paper recycling plant demonstrates the concept of recycling waste into 'wealth'. The real success of such programmes is visible in the seemingly simple acts like students exchanging books in a new academic session, indirectly saving paper and thereby, trees. This is amazing that only a single sheet is saved by each child, 40,000 trees could be saved per year by students only.

Learning the facts about recycling paper will help you as you fulfil your part to keep the environment green. If we keep our minds focused on the desire to be friendly to our earth and her resources, recycling will become important. After a while, we will be in the habit of recycling the paper that we use in the course of a given day.

On the basis of your reading of the passage, answer the following questions :

- (a) Why do you need to think before you take printouts unnecessarily ? 2

- (b) Name some of the products that can be obtained from recycled paper. 2
- (c) How can parents and schools help in creating awareness about paper recycling? 2
- (d) How can students help in saving trees indirectly? 2
- (e) Give a synonym of 'conserve'. 1
- (f) Find a word in the passage which means "the destruction of something, especially waste material by burning". 1

SECTION-B

(Advanced Writing Skills : 25 Marks)

2. You are Gautam / Geeta, General Secretary of Radhakrishnan College, Guwahati. Your college is organizing an educational trip to Delhi during the summer vacations. Write a notice for the college notice board giving all the details of the trip.

(Word Limit : 50 words)

5
